SIMPLE MANUAL

RS201 Quick Guide

rose
English ver.

---

1. Safety Precautions

Warning

· Do not apply excessive force to the product, throw or give impact to the product using sharp objects.
· When used by children, a protector or a guardian should give guidance, and check if safety precautions are being followed.
· Use at the temperature range of 0℃ - 40℃. Do not use in humid places. Use of product at temperatures under 0℃ or in sealed places with high temperatures can lead to failure, corrosion, heat or ignition. Also, moisture or liquid can damage the surface and circuit.
· Always use adapters that are certified by ROSE. Other power adapters may cause malfunction or damage the product (degradation in performance).
· Do not spill waste or liquid on the product. This may damage the parts and circuit. If the product gets wet, contact the nearest service center without turning on the power. However, free aftersale repair service is not available in this case.
· Do not connect antennae or accessories, which are not certified by ROSE, and do not place the product on objects that can cause jamming.(steel desks, microwave, etc.)
· The product is sensitive to radio waves, and its performance can be degraded when used near steel objects or electromagnetic devices.

Caution

· The contents in the instruction manual are based on the default settings of the product.
· Instruction manual can be modified without notice to users for the improvement of the product's performance.
· Features and additional services of the product can vary by software and service providers.
· Data(Pictures, Music, Video Files, etc.) other than the default bell and pictures can be deleted due to carelessness of users or due to product failure and its repair works. ROSE is not liable for damages caused by data loss.
· If you use Bluetooth with 2.4Ghz wireless LAN together, WiFi connection may be slow or Bluetooth audio may not work properly due to signal interference. If you wnat to use them at the same time, it is recommended to use the wireless LAN connection in 5Ghz band.
· Do not use chemical solutions(alcohols, thinners, solvents, etc.) or detergents to clean the product. Rubbing the product using chemical solutions may generate heat and cause fire. Use a soft cloth or a towel for cleaning.
· Do not dismantle, modify, or repair the product at user's will. Free aftersale services will not be available in such cases. If a malfunction occurs, please contact a designated service center for repair.
· Only the programs provided by the manufacturer can be used. If a randomly generated file or a userdeployed file is transferred to the product, it may cause an operation error or cause serious damage to the product. ROSE is not liable for any issues stemming from such case.
· If the touchscreen is damaged, do not touch as it may cause injuries. Call service center for help.
· Due to software update and service provider, it may change features and additional services.

9. Quality Certification

Model Name	RS201
Date of Purchase	Year : 20 , Month : , Date:
Place of Purchase	Firm Name
	Telephone
Serial No.	
Telephone	
Term of Guarantee	2 Years from the Date of Purchase

· **Name of the company that received the conformity assessment :** CITECH Co. Ltd
· **Country of manufacture :** South Korea
· **Identification code of authenticated person :** SYH
· **Authentication number :** R-R-SYH-RS201

Things to check before contacting a service center

· Please restart the product if touch does not work or if the screen freezes. If you press and hold the power key longer than 5 seconds, it will be forcibly rebooted.
· The product might be heated by the internal heat. However, this does not affect the life and performance. Please use with confidence.
· In some instances when the internet is connected, audio might break up due to weak signal, or excessive traffic. Wireless internet reception can also be delayed or disconnected. In such cases, move the location of product and try again.
· Therefore, even with the same content, there may be differences in volume, tone, etc. with other manufacturers and other models.

Homepage www.hifirose.com

· The contents of the manual are subject to change. Please download the latest version from www.hifirose.com. Also, You can download the additional manuals for more information.
· Through the newsletter, you can get information on ROSE's latest news events and new products.

MQA (Master Quality Authenticated)

· MQA is an award-winning British technology that delivers the sound of the original master recording. The master MQA file is fully authenticated and is small enough to stream or download.
· RS201 includes MQA technology, which enables you to play back MQA audio files and streams, delivering the sound of the original master recording.
· The green or blue dot next to MQA logo indicates that the unit is decoding and playing an MQA stream or file, and denotes provenance to ensure that the sound is identical to that of the source material. It glows blue to indicate it is playing an MQA Studio file, which has either been approved in the studio by the artist/producer or has been verified by the copyright owner.
· Visit mqa.co.uk for more information.
· MQA and the Sound Wave Device are registered trade marks of MQA Limited.© 2016
